

Page 1: Introduction

This is the first page of the test PDF.

Features

- Simple text
- **Bold text**
- *Italic text*

(Padding to ensure content...)

1. Item 1
2. Item 2
3. Item 3

Page 2: Code Section

This should be on a new page if the previous content fills the page, but since we don't have explicit page breaks, we'll rely on the structure. Actually, let's just assume this is a single document we will modify.

Code

```
console.log('Hello World');  
console.log('Line 2');  
console.log('Line 3');
```
